

CADILLAC LOWER INNER

Rare Parts, a manufacturer of rare automotive steering and suspension components, has introduced a high-quality reproduction of the lower inner for 1934-35 Cadillac's (355D, 370D, 452D). We make these lower inners from billet steel and then heat-treat them for maximum strength and superior wear resistance. If that isn't enough, we also guarantee our steering and suspension parts for life to the original purchaser. As with all Rare Parts steering and suspension pieces, the part is guaranteed to meet or exceed OEM quality. Since 1981, Rare Parts has manufactured rare steering and suspension components for the wholesale market. Rare Parts has a full test facility, conducting both destructive and cycle tests, and an inventory of more than 2 million steering and suspension components!
