The engineers at Rare Parts Inc. have developed a unique high-quality adapter that will convert the applications listed above, from power to manual steering! Until now this labor-intensive swap required replacing much of the steering assembly. With the new adapter you simply remove the old control valve and thread the adapter on in its place. Installation of the Rare Parts adapter allows for the elimination of the control valve, ram assembly, pump and leaky hoses. (p/n 27483)
